

Supporting Independent Language Learners with Workshops

自主学習支援講座の取り組み方とその効果

Amy Stotts/Seiko Oguri

82 LET Chubu Chapter Conference, Nov.9, 2013

Feedback from the participants

Questions:

1. Do you feel any changes in your learning?
2. Why do you think the workshops are worth attending?
3. Have your findings from the workshops given any influence on your learning beside language study?

Feedback:

1. Any changes?
 - ✧ expanded ideas of using materials, even the ones I've been using
 - ✧ got to know there are so many materials untouched (in the SI Room)
 - ✧ got to know there are various ways to use even one single material
 - ✧ became able to enjoy learning English
 - ✧ became interested to know each material has various ways for us to learn effectively if we know how to use it properly (including dictionaries and newspaper)
 - ✧ Learned to reflect the findings at the workshops (handouts) in my self-study
2. Worth attending?
 - ✧ Get to discover ways to use materials/facilities in the SI effectively
 - ✧ Get to meet other serious learners trying to improve English
 - ✧ Get to know other learners and stimulate on another
 - ✧ Get stimulated from other serious learners especially when I feel less motivated or slowing down
 - ✧ Be able to feel confident with the ways to use certain materials
 - ✧ Helps get more motivated or keep the motivation to learn more
 - ✧ Get to know effective ways to utilize familiar materials and practice those ways at the workshop step by step
3. Influenced learning ?
 - ✧ Classes and assignments turned into opportunities where I discover something, research into something
 - ✧ Got to know acquiring knowledge is not the goal but the start of learning (My biggest finding from the workshops)
 - ✧ Became more careful to pay attention to the elements I learned from the workshop while self-study
 - ✧ Discovered we can find more effective ways of study if learners ourselves are more willing to make learning better in any field
